

Aquaphotomics 101: Battery Creation

Aquaphotomics is the study of how light and water interact as the video above mentions. Water has both a battery and engine component and many other gears that we are yet to resolve.

The key to understanding this new science is to understand that it is the Stairway to Heaven for understanding how life is able to summon energy anytime it needs it instantaneously to do physiologic work. Food alone cannot account for the amount of ATP a cell makes or uses.

**THE WATER CREATED BY YOUR
MITOCHONDRIA HAS A MISSION IN YOUR
BODY TO MOVE CERTAIN IONS LIKE
PHOSPHORUS, SULFUR, AND SELENIUM IN IT.
THERE THEY COMBINE TO FORM A QUANTUM
BATTERY, CAPABLE OF INSTANTANEOUS
RECHARGING FROM NATURE'S ELECTRIC AND
MAGNETIC FIELDS FROM THE SUN AND EARTH.**
