CPC #28: Is obstructive sleep apnea protective?

IS SLEEP APNEA PROTECTIVE AND NOT PATHOLOGIC?

I believe the answer is yes. Why do I say this?

It appears sleep apnea protects defective mitochondria from high oxygen tensions. Want to know more watch my May 2018 webinar to understand the mitochondriac perspective. I go further into detail in my August 2018 webinar that is being released today to my full members.

This means it is really not a disease……it is a reaction to low NAD+ and high ROS made in mitochondria to control the flow of oxygen just as a carburetor does in a car.
