

CPC #35: The Woman Code: Food/Skin/Makeup

New podcast out for the Thanksgiving week for you to enjoy.

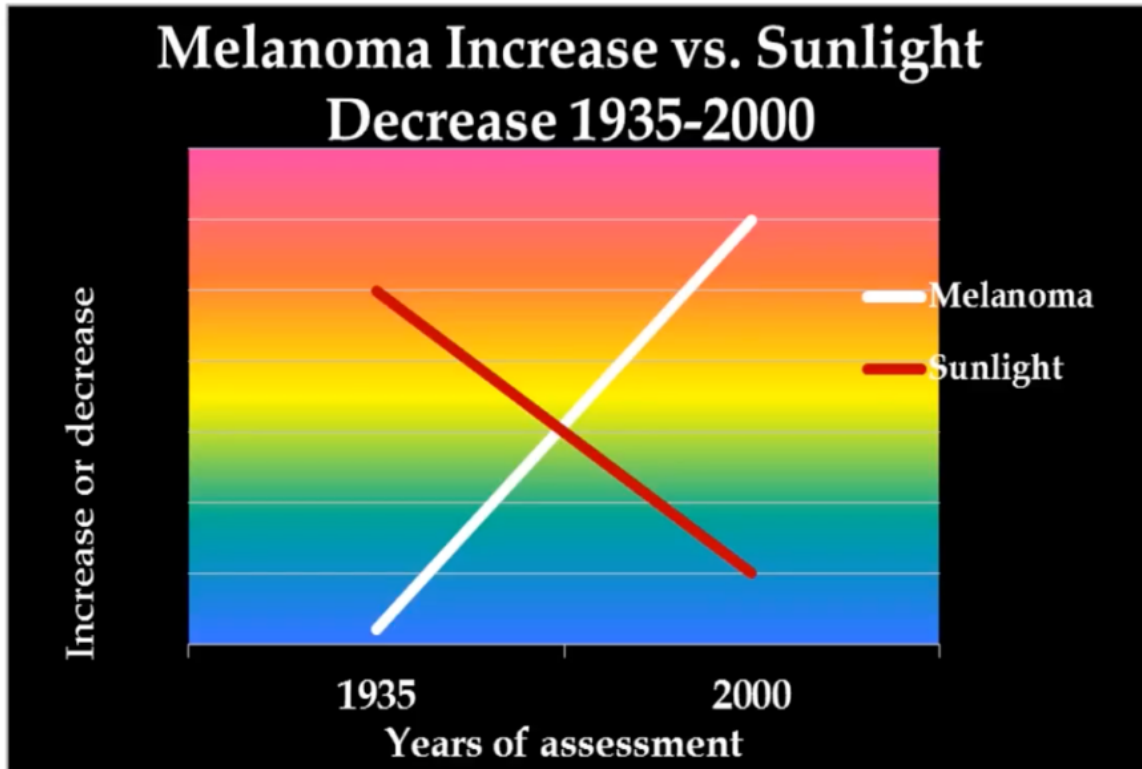

In this podcast we go over some classic ideas about how food is an electromagnetic blueprint and we discuss the details linked to freed Vitamin A and how it destroys photoreceptors.

Why is colon cancer exploding in a blue light world?

Why does our skin bleach? Is it tied to hair bleach ladies use for their hair?

Catalase is one of the photoreceptors that Vitamin A destroys in Vitiligo. Artificial blue light and nEMF cause this stimulus in this autoimmune diseases. We also talk about a lady who is a lawyer in Boston and how her job gives her melasma.

Does Sun Exposure Cause Melanoma?
