

HYPOXIA #10: HOW DOES C-19 LINK TO NAD⁺ DESTRUCTION?

Most people are not interested in learning what truth is. They would sooner sit in front of a box that continuously spits out lies and misinformation and entertains them. If that box emits blue light or nnEMF it might exacerbate an illness you have.

Did you know that NAD⁺/NADH in cytochrome 1 is a fluorophore protein complex that transfers electrons in the electron transport chain of the inner mitochondrial membrane?
