

# **HYPOXIA #11: HOW DOES HYPOXIA LINK TO INFERTILITY?**

U.S. Birthrates Fall to a Record Low ([click here to read article](#))

**Alchemist & Metaphysician** = ancestral dogmatic beliefs are that biochemistry is definitive science. Biochemistry is really a solid state story of how light alters valence electrons within hydrated semiconductive proteins. This light is capable of changing their physiologic ability as the electromagnetic signals on the surfaces of them changes geometry in their lattice. This is why electromagnetic charge changes always involve shape shifting of proteins made by DNA surrounded by water made by mitochondria. Life runs on being able to harness the energy of an excited electron to the ground state. Life cannot do this well when pseudohypoxia exists at cytochrome one with lowered NAD<sup>+</sup>. Technology's nEMF and blue light cause this quickest today.

**BLUE LIGHT LOWERS VITAMIN A AND MELATONIN ANYWHERE MELANOPSIN IS. MELATONIN CONTROL mtDNA AUTOPHAGY = MITOPHAGY**

**BLUE LIGHT LOWERS DHA IN CELL MEMBRANES OF EYE AND SKIN RUINING BAZAN EFFECT IN EYE. THE LOSS IN THE SKIN INCREASES THE DHA NEEDS GLOBALLY**
