

QT #9: Krebs Bicycle 2: The Retina

Are the LCHF experts correct about biochemistry and cancer with respect to food dogma?

NOPE

NON PATHOLOGIC WARBURG SHIFT = cancer cells tend to convert glucose to lactate despite the presence of oxygen. Warburg called this phenomenon 'aerobic glycolysis', a term that is now synonymous with the 'Warburg effect.'

An ignorant person's report
of what a wise man says can
never be fully accurate,
because they unconsciously
translates what he hears into
something he can
understand.
