

Vagus Nerve Mito-Hacking

Each branch of science works within its own particular paradigm. What I am going after assaults many beliefs across many scientific theories. No paradigm should be safe under the inquiry of someone looking for how nature might be at work below our current beliefs and precepts of truth.

Observation and perception is my gift. I don't like to miss anything to make connections to how life operates. Unconventional does not mean the idea for a mito-hack cannot not work.

**SPACE SCIENCE HAS TAUGHT US THAT MAN'S
IMAGINATION IS NOT AS WILD AS NATURE'S
IS. WE SHOULD REMEMBER THIS IN BIOLOGIC
SCIENCE, BUT WE RARELY DO.**
